The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Reasons for Allowance**

COMES NOW the Patent Office, by Patent Examiner, and states at least a reason for This Application to wit: that the Prior Art neither teaches or reasonably suggests the combination of steps which include (a) providing a core layer with a first and second dielectric layers wherein each dielectric layer has at least a first and a second conductive column through each of the dielectric layers, (b) laminating the core layer, the first dielectric layer and the second dielectric layer with the core layer being placed between the first and second dielectric layers, (c ) forming at least a first through hole which passes through the laminating layer, (d) filling the first through hole with a conductive column and (d) forming a first patterned conducting layer and a second patterned conductive layer on two sides of the laminating layer respectively.

Furthermore the Patent office Saith not.
